### Valuable Discovery in Complexion Beautifier

Because of its peculiar power of absorption, also because it serves every semollient purpose, ordinary mercolized wax is perhaps the most valuable complexion beautilise discovered within recent years. If one uses this she needs no tollet cream. Some use powder afterward, but this is not necessary. This rule for applying mercolized wax has been found very satisfactory: Weach the face with warm water, drying lightly. Before thoroughly dry, anoint face and neck with the wax, but don't rub it in. The favorito way is to use before retiring, sliowing it to remain on all night and washing it or in the morning with warm water. All druggists have this wax in original one-ounce puckages. packetes.

For the removal of a wrinkled or fabby condition there's nothing better than to bathe the face in a solution made by dissolving I ounce powdered saxolite in 15 pint witch hazel. Beneficial results are quickly noticeable.
